Growth Trends

The Food & Beverage (F&B) manufacturing industry in India is valued at USD 370 billion in 2022, the sector is projected to reach USD 660 billion by 2026, growing at a 14-15% CAGR. India is the largest producer of milk, second-largest producer of food and boasts a growing demand for packaged food and beverage. The government's Make in India initiative and Atmanirbhar Bharat program are further fuelling the sector's expansion, with rising export opportunities and an increasing focus on sustainable manufacturing practices.

South India, contributing over 30% of India's total F&B production, is a key player in the sector. Valued at USD 50 billion in 2022, the region is projected to grow at a 12-14% CAGR. Its rich agricultural output, strong infrastructure and rising export potential make it a highly promising manufacturing hub.

What Does The Food & Beverage Manufacturing Industry Require?

Innovation
in Packaging
Design

Tailored
Solutions for the
Food Sector

Compliance and
Regulatory Guidance

Sustainability
Focus

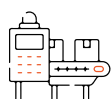

Collaboration
with R&D and
Innovation Hubs
